

Please keep in mind that...

Good health involves no smoking, an annual physical exam, and continued screening as recommended.

If you need help to quit smoking, please contact our **Smoking Cessation Program** at **901.448.2918**.

Do you think you might be at risk for lung cancer?

At **West Cancer Center**, our Lung Cancer Screening Program provides low-dose CT screening services to current and former smokers, allowing for early detection of lung cancer at its earliest stage, when treatment is most effective.

Am I eligible for West Cancer Center's lung screening program?

Screening is recommended for individuals who meet the criteria of the National Cancer Institute's National Lung Cancer Screening Trial. Eligibility requirements include:

- Between the ages of 55 through 77 years old
- Have a 30 pack-year history of smoking (this means 1 pack a day for 30 years, 2 packs a day for 15 years, etc.)
- Current smoker, or have quit within the last 15 years

How do I schedule my lung cancer screening?

If you meet the above guidelines, we encourage you to schedule a lung cancer screening with our West Cancer Center team. The order should be entered as a low dose CT (LDCT) for lung cancer screening.

To schedule a lung cancer screening and/or to discuss West Cancer Center's Lung Cancer Screening Program, contact **Suzie Glass** at **901.609.3525** or lungscreening@westclinic.com.

150,000 +
the number of Americans that are
expected to die from lung cancer in 2016.

Only **17.8%** of patients will survive **5 years** after a lung cancer diagnosis. However, if lung cancer is caught in the early stages, that number jumps to **54%** of patients surviving **5 years** after their diagnosis.

Unfortunately, only **15%** of lung cancer cases are caught at an early stage.
